PROFESSIONAL SUMMARY

Software Engineer with 3+ years of end-to-end experience designing, building, and shipping production web applications using Angular, React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and MySQL. Delivered logistics back-office systems at PostEx, a CRM SaaS platform at LitGrey Technologies, and a portfolio of full-stack products spanning job portals, AI-integrated content platforms, enterprise dashboards, and e-commerce systems. Consistently writes modular, maintainable code with emphasis on REST API design, JWT and WebAuth authentication, performance optimization, and responsive UI development. Effective contributor in Agile teams across cross-functional environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend Frameworks: Angular 14+, React.js, Next.js 13+, React Router, Redux, NgRx

UI & Styling: Tailwind CSS, Bootstrap 5, Responsive Design, AOS, SCSS

Backend: Node.js, Express.js, REST API Design, JWT Authentication, WebAuth, Mongoose ORM

Databases: MongoDB, MySQL, SQL Server

DevOps & Tools: Git, GitHub, BitBucket, GitHub Actions, CI/CD, Docker, Vercel, Postman, VS Code

Engineering Practices: Agile / Scrum, Component Architecture, State Management, API Integration, Performance Optimization, Code Review, SaaS Product Development

PROFESSIONAL EXPERIENCE

PostEx · *Software Engineer* · Nov 2025 – Present

- Designed and built internal back-office web platforms powering logistics and shipment operations, serving cross-functional teams with real-time tracking and operational data.
- Architected Node.js and Express.js REST APIs integrated with Angular/React frontends, delivering reliable real-time data synchronization across operational modules.
- Partnered with product managers and operations leads in an Agile sprint cycle to scope, implement, test, and release production features on schedule.

Team Seven (Pvt) Ltd · *Full Stack Developer* · Jul 2023 – Nov 2025

- Built and maintained multiple full-stack applications end-to-end using Angular, Node.js, Express.js, and REST APIs, covering frontend, backend, and database layers.
- Developed performant, mobile-responsive landing pages and marketing sites using Angular and Bootstrap, increasing cross-device compatibility and user engagement.
- Established and enforced Git branching and code review workflows across the team, reducing integration conflicts and improving release stability.

LitGrey Technologies · *Frontend Developer (Contract)* · Jun 2025 – Oct 2025

- Delivered Angular feature modules for a CRM SaaS product, connecting UI components to RESTful backend services for accurate data display and form handling.
- Reduced frontend defect rate by building reusable Angular components with clear input/output contracts, improving maintainability across the codebase.

PROJECTS

Contentium — AI-Powered Content Generation Platform (Final Year Project) | Node.js · Express.js · MongoDB · Mongoose · JWT · Google Gemini API · Hugging Face Stable Diffusion API

- Engineered a production-grade Node.js REST API platform using a strict MVC architecture (Controllers, Models, Routes, Middleware), delivering clean separation of concerns and a maintainable codebase.
- Integrated Google Gemini API for AI-driven text rephrasing and Hugging Face Stable Diffusion API for programmatic image generation, exposing both capabilities through authenticated REST endpoints.

- Secured all routes with JWT-based authentication middleware, managed MongoDB collections with Mongoose schemas, and handled file uploads with environment-driven configuration.

MERN Stack AI Chatbot | React.js · TypeScript · Node.js · Express.js · MongoDB · Tailwind CSS · Vite · Docker

- Built a full-stack, type-safe chatbot application with TypeScript across 80%+ of the codebase, demonstrating production-grade discipline on both React frontend and Express backend.
- Configured Express REST routes with CORS policy enforcement, Mongoose-backed MongoDB data layer, and a Vite-bundled React SPA with React Router for client-side navigation.
- Containerized the full application stack with Docker, enabling reproducible local development and a CI-ready deployment pipeline.

Executive Dashboard — Enterprise Operations Platform | Next.js 13 · Node.js · Tailwind CSS · MySQL · WebAuth

- Architected a Next.js 13 server-rendered dashboard for real-time operational monitoring, integrating RESTful backend APIs for live data visualization across multiple business units.
- Implemented WebAuth (FIDO2) passwordless authentication — a significant security upgrade over password-based systems — providing enterprise-grade access control without credential exposure.
- Optimized API response handling and component-level data fetching, reducing perceived load time and improving dashboard reliability under concurrent user sessions.

Yanbu International Job Portal | Angular · Node.js · Bootstrap · REST APIs · i18n Multilingual System

- Developed a full-stack job portal for the Gulf region, aggregating listings from multiple sources into a unified, searchable platform for Arabic and English-speaking job seekers.
- Built a complete bilingual i18n system supporting Arabic (RTL) and English (LTR) layouts with dynamic language switching, broadening the platform's addressable market.
- Integrated RESTful APIs for real-time job listing synchronization and designed an Angular component architecture enabling scalable feature additions without codebase disruption.

EverGreen Sable — Business Data Platform | Next.js · TypeScript · Tailwind CSS · AOS · CSV Export · Excel Integration (SheetJS)

- Developed a TypeScript-first Next.js business application with a fully responsive UI and scroll-triggered animations, achieving consistent rendering across screen sizes.
- Engineered real-time CSV export and SheetJS-powered Excel integration, enabling stakeholders to generate automated reports on demand and eliminating manual data extraction workflows.

Opticians.pk — CRM, eStore & Registration System | Angular · Node.js · SQL · Bootstrap · JWT Authentication

- Delivered a modular full-stack enterprise application unifying CRM, eStore management, and user registration into a single Angular-powered platform with role-based access control.
- Designed a normalized SQL database schema supporting multi-entity relationships and implemented secure JWT authentication across all critical user flows.

EDUCATION

Bachelor of Science in Computer Science · Superior University Gold Campus, Lahore · 2021 – 2025
